## LINKEDIN POST — Ready to Copy & Paste

---

Just finished a major upgrade to the SZL Holdings GitHub presence — and I wanted to share what we've built.

One founder. Six platforms. 16 live applications. One TypeScript monorepo.

### Since the last update:

- Full visual showcase on both GitHub profiles (personal + organization)
- Real screenshots of every platform embedded in READMEs
- Architecture documentation, tech stack, and operating philosophy
- All source code secured in private repos — no downloads, no releases, no leaks
- Buyer memo and investor-ready documentation

### The platforms, all live and deployed:

**Vessels** — Maritime fleet command, AIS analytics, voyage management, sanctions screening

**Aegis** — Unified SOC command, threat correlation, CVE tracking, incident governance

**Terra** — Real estate market intelligence, distress engine, deal pipeline

**Lyte** — Business observability, execution risk detection, ownership drift analysis

**PRISM Counsel** — Legal matter command, deadline tracking, pressure scoring, proof chains

**Carlota Jo** — Private advisory coordination for luxury residential environments

### The numbers:

- 446 database tables
- 1,618+ API endpoints
- 8 web applications + 8 mobile apps
- Full TypeScript — zero JavaScript
- One compounding architecture

### The principles:

- AI cannot execute without human confirmation
- Every recommendation includes source citations and confidence scores
- Failures surface immediately — they never hide
- Shared fabric, domain specialization

### Links:

- GitHub (personal): [github.com/stephenlutar2-hash](https://github.com/stephenlutar2-hash)
- GitHub (organization): [github.com/szl-holdings](https://github.com/szl-holdings)
- Platform: [szlholdings.com](http://szlholdings.com)
- Writing: [szlholdings.substack.com](http://szlholdings.substack.com)

Open to design partner conversations, enterprise evaluation, and investment introductions.

## GITHUB PROFILES — What Buyers and Investors See

### Personal Profile: [github.com/stephenlutar2-hash](https://github.com/stephenlutar2-hash)

Public profile README with embedded screenshots of all 8 web applications, SVG banners, tech stack icons, platform descriptions, architecture overview, and contact links.

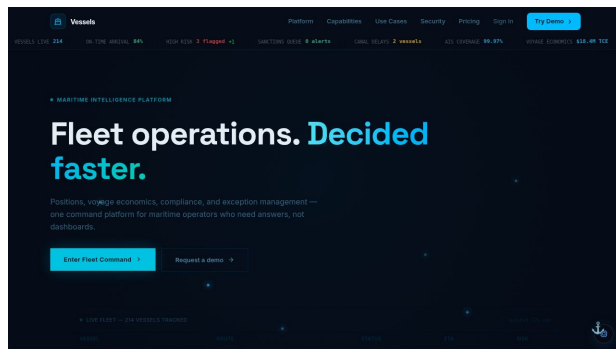

### Organization Profile: [github.com/szl-holdings](https://github.com/szl-holdings)

Organization README with animated header, badge metrics, full platform grid with screenshots, tech stack, operating philosophy, and investor contact information.

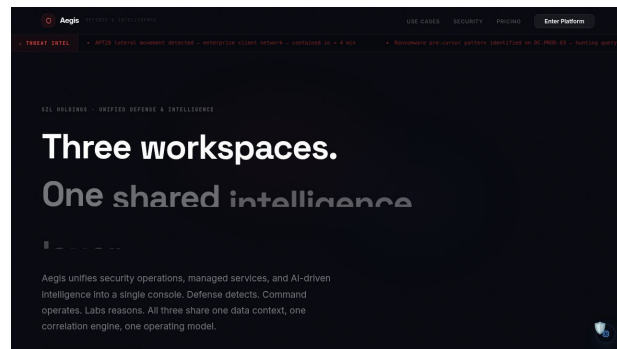

### Platform Repository: [szl-holdings-platform \(PRIVATE\)](#)

Private repository with polished README, embedded screenshots, architecture documentation. Source code access available under NDA for qualified buyers.

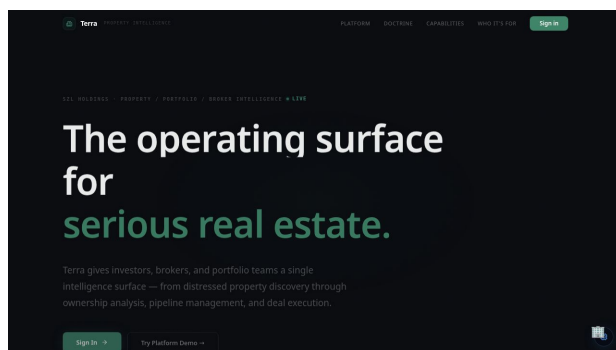

## PLATFORM SCREENSHOTS

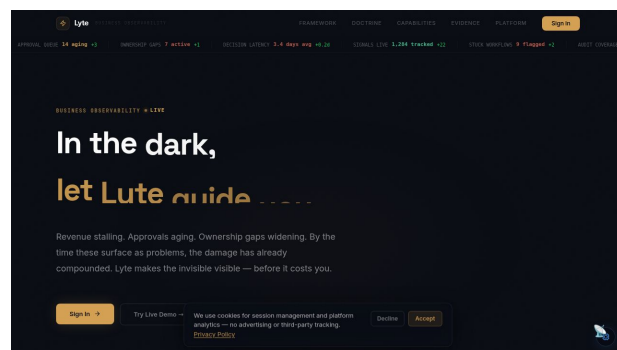

Vessels — Maritime Intelligence

Aegis — Defense & Intelligence

Terra — Real Estate Intelligence

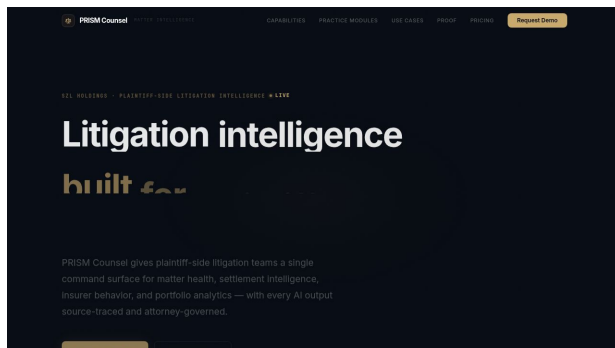

Lyte — Business Observability

Governed Operational Intelligence Platforms

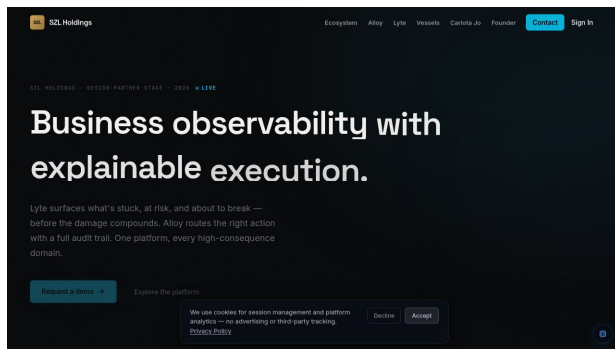

stephenlutar2@gmail.com | szlholdings.com | linkedin.com/in/stephenlutar

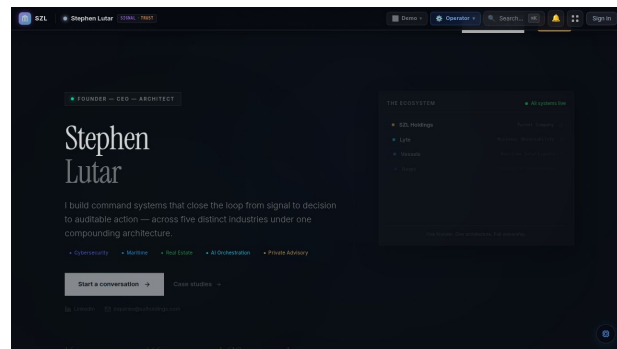

PRISM Counsel — Legal Matter Command

Carlota Jo — Private Advisory

SZL Holdings — Command Surface

Stephen Lutar — Founder Portfolio

## SECURITY POSTURE

- All source code repositories are PRIVATE
- No tar.gz or zip files in any repository or git history
- No GitHub releases with source code download links
- Only public repos: personal profile README (required) and org .github (required for org profile)
  - Neither public repo contains source code
  - Clean IP — all code founder-written, no contractor dependencies
    - Standard open-source dependencies (MIT/Apache licensed)
