

Aegis — Unified Defense & Intelligence

SOC operations, threat intelligence, and MSP management converged.

Manifest snapshot · 2026-04-19

POSITIONING

Aegis converges security operations, managed-service ticketing, and threat intelligence into a single command surface. Designed for organizations that cannot tolerate operational drift between security and infrastructure tooling.

CAPABILITY SNAPSHOT

TOTAL CAPABILITIES	READINESS SCORE	LIVE	WORKING DEMO	PARTIAL / AT RISK
7	72%	2	3	2

STATUS MIX

TOP PROOF POINTS

CAP-029 · SOC dashboard — MITRE ATT&CK coverage, incident management

SOC dashboard renders; incident lifecycle (detection!triage!containment) functional with seeded events; MITRE technique mapping present

status: Working Demo · module: artifacts/aegis/src/, artifacts/api-server/src/routes/firestorm/

CAP-030 · Live threat intelligence — CISA KEV, NVD CVE, MITRE ATT&CK v14, AbuseIPDB

All four feeds confirmed live: CISA KEV (1,554+ entries), NVD CVE search, MITRE ATT&CK GitHub pull, AbuseIPDB IP reputation

status: Live · module: artifacts/api-server/src/lib/intelligence-feeds.ts

CAP-033 · MSP Command workspace — NOC, ticketing, billing for managed service providers

MSP client list, ticket queue, NOC views render with seeded data (mspClients, mspTickets seed arrays)

status: Working Demo · module: artifacts/aegis/src/pages/ (MSP pages), artifacts/api-server/src/routes/msp.ts, msp-live.ts

CAP-034 · ATLAS Spatial Runtime demo — Threat Mesh, Incident Replay, Scenario Branching

Full replay viewer with seed-data.ts; branch explorer functional; no live execution environment

status: Working Demo · module: artifacts/aegis/src/ (ATLAS pages), artifacts/api-server/src/routes/atlas-spatial-runtime.ts

CAP-035 · Series A investor pitch deck (slides S01–S09)

Static slide content fully rendered and navigable; slides-manifest.json drives content

status: Live · module: artifacts/aegis/src/ (slide components)

OPEN RISKS & GAPS

No capabilities currently flagged as stub, broken, or undocumented for this product.

METHODOLOGY

Every figure in this brief is derived from artifacts/audit/platform-capability-manifest.json (manifest version 1.0.0). The readiness score weights live capabilities at 1.0, working demos at 0.75, and partials at 0.4. Capability statuses use SZL's published status definitions: live, working_demo, partial, stub, broken, undocumented. This brief is regenerated whenever the manifest changes — no manually edited claims.
