

SZL Holdings — Capability Statement (v2)

Founder / Principal: Stephen Lutar **Email:** stephenlutar2@gmail.com **Headquarters:** New York State **Public organization:** github.com/szl-holdings **Document date:** May 5, 2026 (v2.0 refresh)

Core Competency

SZL Holdings builds **governed operational-intelligence platforms** — software that bridges data ingestion, risk analysis, AI-supported decision-making, execution, and auditability into a single continuous workflow. Every action is logged, every decision is provenance-bound, every gated approval is named.

Differentiators

- **Open-source runtime in production.** [@szl-holdings/ouroboros](https://github.com/szl-holdings/ouroboros) v6.2.0, full test suite, dependabot, CodeQL.
- **DOI-pinned theoretical foundation, audited by its successor paper.** Three peer-style papers: v3 ([10.5281/zenodo.19944926](https://doi.org/10.5281/zenodo.19944926)), v9 (Lutar Invariant Family, 17 pp, May 5 2026), v10 (Audit Closure Operator Λ_{10} , 11 pp + Appendix A, May 5 2026). v10 certifies that every formula in v9 executes against the live shipping repo.
- **Proof-chain by construction.** Every output carries a hash chain back to its inputs and the approver who released it.
- **CPS — Covenant Proof Standard.** A first-class API for executing, approving, and rolling back governed cross-vertical workflows with auditable receipts.
- **Live agent gateway with OPA enforcement.** Every agent action passes through a runtime policy boundary.
- **Self-correcting publishing record.** The May 2 thesis re-release publicly retracted and replaced an earlier version after a self-audit. The v9 → v10 sequence continues that discipline.

Capabilities

- AI governance and responsible-automation policy enforcement
- Continuous-monitoring and operational-transparency systems

- Cross-system data reconciliation with auditable lineage
- Cyber-resilience command surfaces (Sentra, governed adversary loop)
- Domain-specific intelligence (real estate, maritime, legal, advisory)
- **Proof distribution to regulators** (Trust Center, Trust Exchange, Public Trust Portal)
- **Cross-vertical CPS payload execution** (ROSIE)

Verified Platform Numbers (as of 2026-05-05)

- 8 customer-facing product surfaces unified by 1 orchestration layer (A11oy)
- 6 platform primitives
- 848 provisioned database tables
- 5,524 API endpoint declarations
- 126 monorepo packages
- 28 Ouroboros packages, 133 runtime test calls, 62 guardrails tests passing
- 76 nodes / 95 typed edges across 11 domains in Codex v11
- 44 original innovations in the sovereign engine
- 126 security tests passing
- 23 CI workflows
- 3 published peer-style papers (Zenodo DOIs)

NAICS Codes

- **541512** Computer Systems Design Services (primary)
- **541511** Custom Computer Programming Services
- **541519** Other Computer Related Services
- **541611** Administrative Management and General Management Consulting Services
- **541690** Other Scientific and Technical Consulting Services

Business Profile

- **Size:** Small business, single-founder
- **UEI / CAGE / DUNS:** To be assigned upon [SAM.gov](https://sam.gov) registration
- **Set-aside eligibility:** Under self-cert review (small-business; other set-asides per Empire APEX guidance)

What SZL Holdings Is Not Claiming

In the interest of credibility with procurement counsel: not currently performing on a federal contract, no federal cloud authorization, not externally audited, no signed platform customers. The strength is the public, verifiable proof — not pretended traction.

Public Proof Artifacts

Asset	Location
Open-source runtime	github.com/szl-holdings/ouroboros (v6.2.0)
Theoretical foundation v3	github.com/szl-holdings/ouroboros-thesis (paper-v3-2.0.0 , DOI 10.5281/zenodo.19944926)
Theoretical foundation v9	paper-v9-1.0.0 (Lutar Invariant Family, 17 pp, 2026-05-05)
Theoretical foundation v10	paper-v10-1.0.0 (Audit Closure Operator Λ_{10} , 11 pp + Appendix A, 2026-05-05)
Paper license	CC-BY-4.0
ORCID	0009-0001-0110-4173
Live LaaS API	POST /api/ouroboros/lutar/v10
Source-of-truth audit	SOURCE_OF_TRUTH.md + audit/source-of-truth.json
