Most founders build one product. We built the operating system for five industries.

Each platform is production-grade. Each shares a single intelligence layer. Every signal flows back to the center.

This is what **compounding** looks like at the architecture level.

- DEFENSE
- MARITIME
- REAL ESTATE
- LEGAL
- ADVISORY

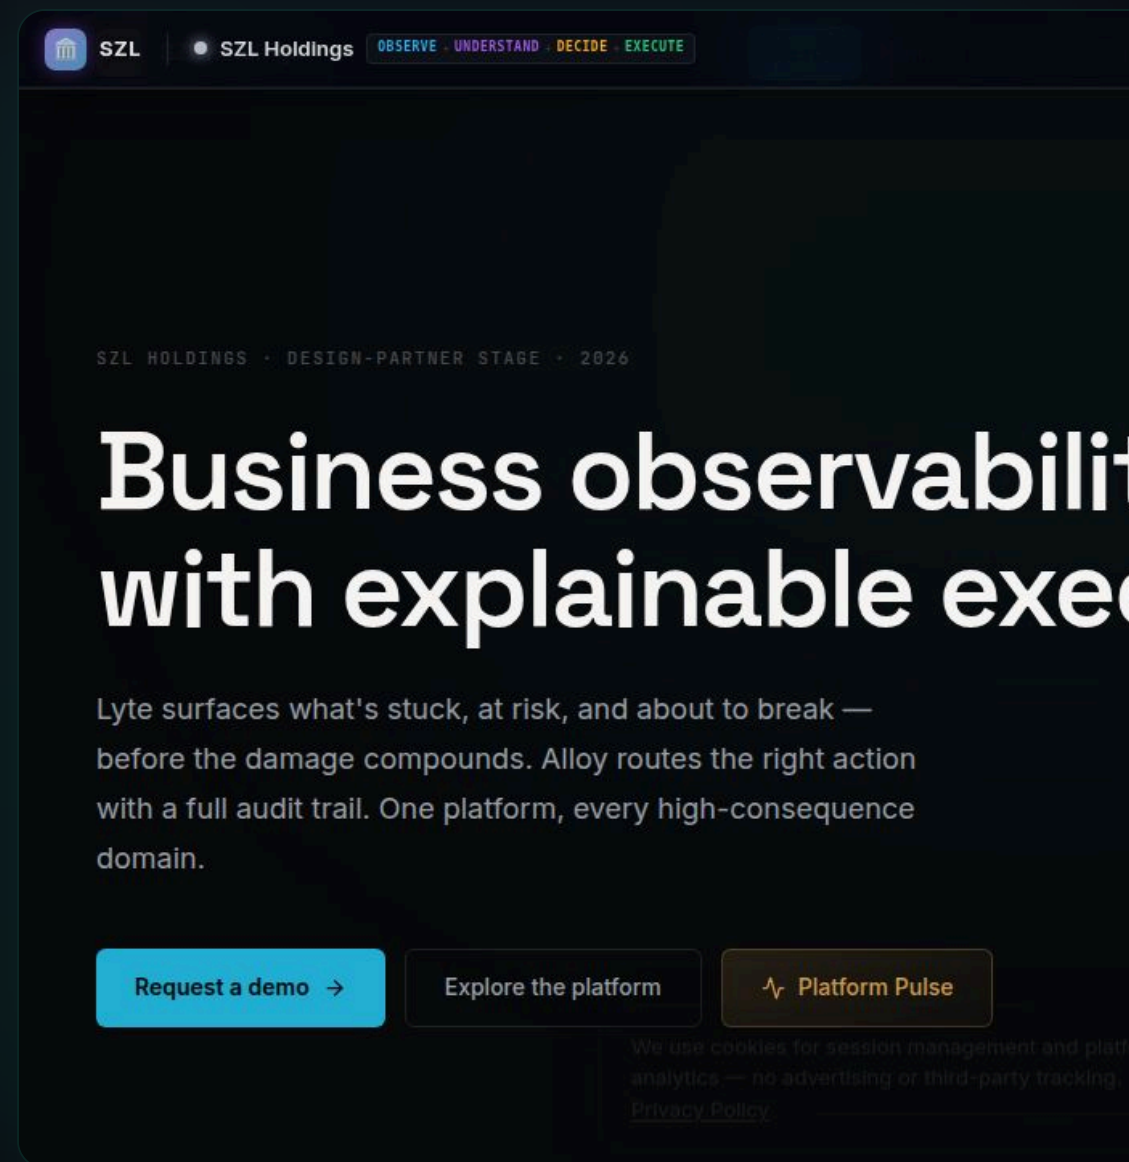

SZL HOLDINGS

Business Observability with Explainable Execution.

OBSERVE → UNDERSTAND → DECIDE → EXECUTE

The parent command layer. Every subsidiary surfaces signals here. Every decision gets an audit trail. Nothing moves without explainable cause.

- Cross-platform signal aggregation
- Real-time anomaly detection
- Full decision audit log

LYTE — BUSINESS OBSERVABILITY ENGINE

*"In the dark,
let Lyte
guide you."*

REVENUE STALLING. APPROVALS AGING.
OWNERSHIP GAPS WIDENING.

By the time these surface as problems, the
damage has already compounded. Lyte
makes the invisible visible — before it costs
you.

- Real-time pipeline health monitoring
- Approval workflow bottleneck detection
- Revenue risk scoring with explainable causality

 Lyte BUSINESS OBSERVABILITY

FRAMEWORK

BUSINESS OBSERVABILITY

In the dark,
let Lyte guide you.

Revenue stalling. Approvals aging. Ownership gaps widening. By the
time these surface as problems, the damage has already
compounded. Lyte makes the invisible visible — before it costs you.

VESSELS — MARITIME INTELLIGENCE
PLATFORM

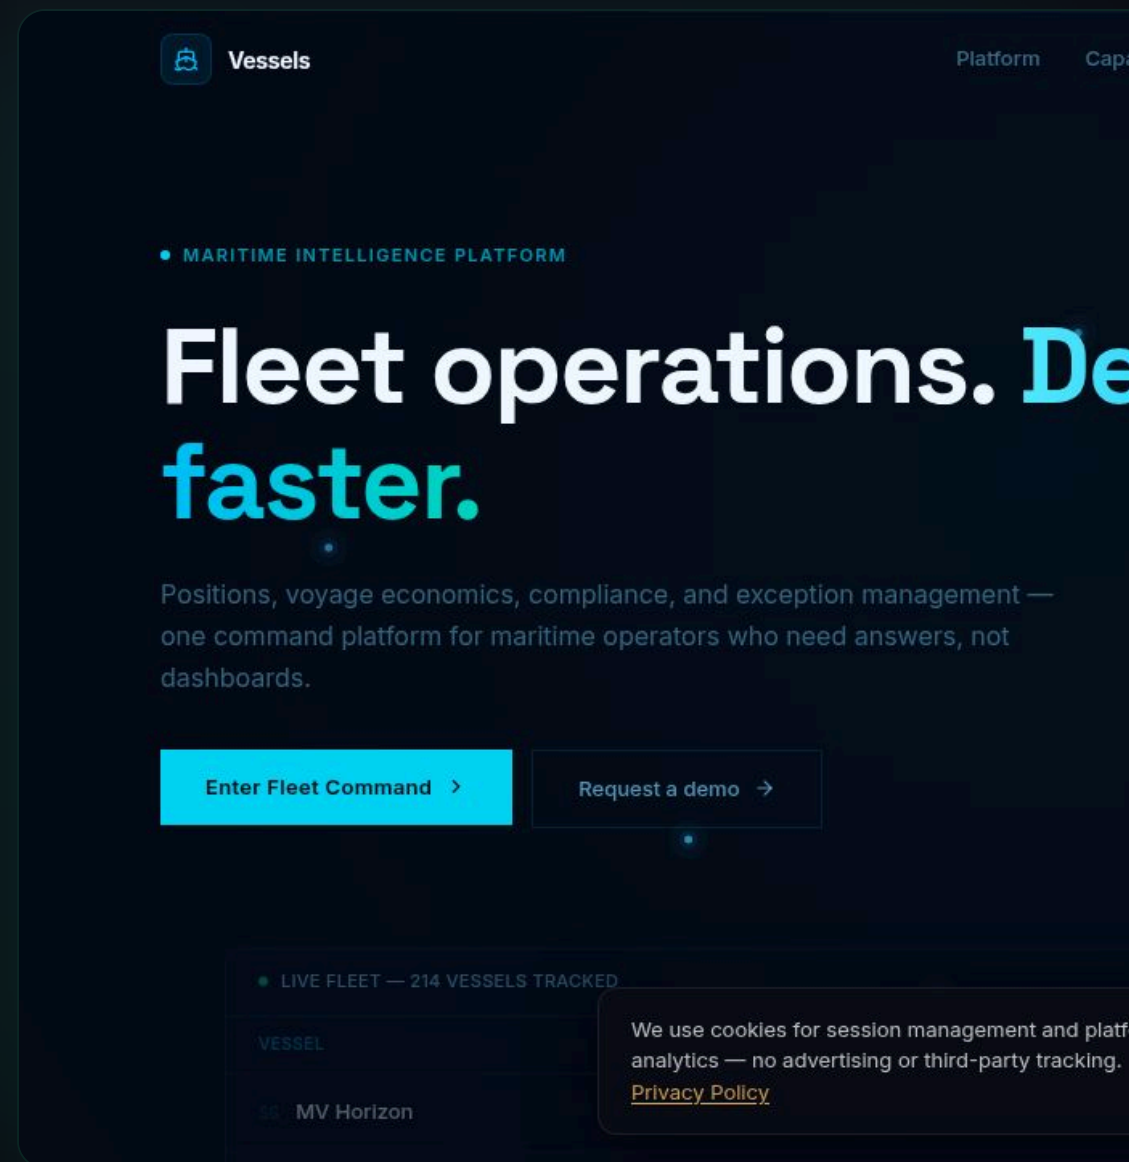

214

VESSELS TRACKED. ONE COMMAND
SURFACE.

Fleet Operations. Decided Faster.

Positions, voyage economics, compliance, and exception management — unified for maritime operators who need answers, not dashboards.

- Live AIS position tracking across global fleets
- Voyage P&L with port cost modeling
- Sanctions screening and compliance monitoring

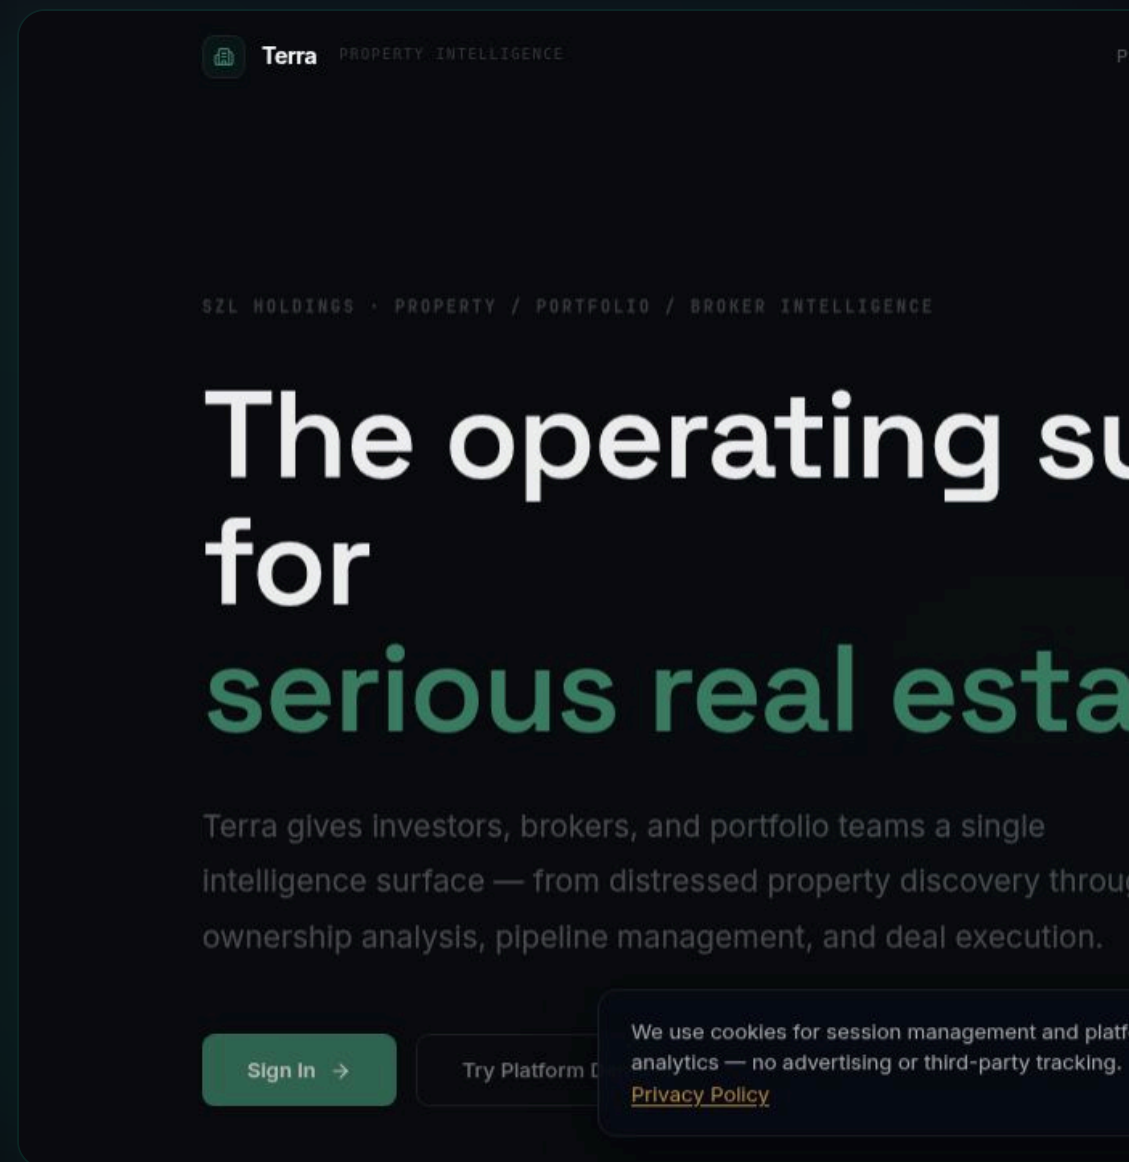

TERRA — PROPERTY INTELLIGENCE

The Operating Surface for Serious Real Estate.

FROM DISCOVERY THROUGH DEAL EXECUTION
— ONE SURFACE.

For investors, brokers, and portfolio teams
who treat real estate like an operating
business.

- Off-market property discovery with ownership graph
- Deal pipeline management with probability scoring
- Portfolio performance and exit modeling

AEGIS — UNIFIED DEFENSE & INTELLIGENCE
COMMAND

Stop Breaches. Before They Start.

THREE WORKSPACES. ONE SHARED
INTELLIGENCE LAYER.

DEFENSE

XDR & threat detection. Continuous monitoring across every endpoint and perimeter.

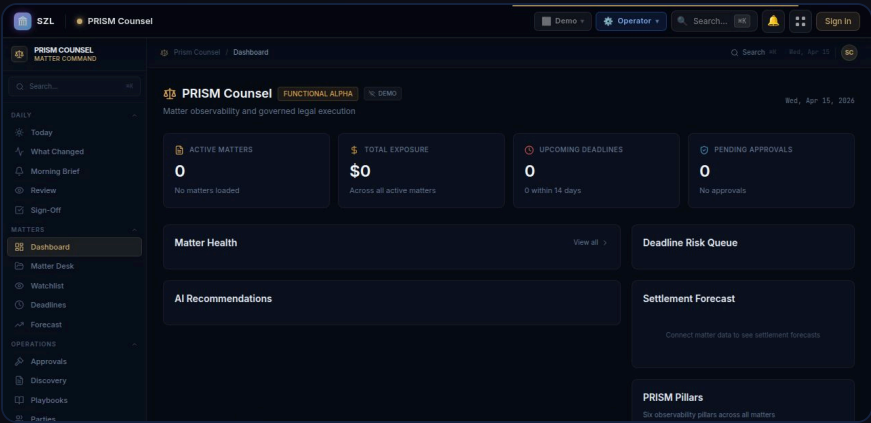

COMMAND

SOC automation & managed operations. From detection to remediation in minutes.

LABS

AI inference & threat reasoning. Context that closes the loop on every incident.

<4 min	<12 min	94%	99.7%	2.1M/day
MTTD	MTTR	AI CONFIDENCE	ATT&CK COVERAGE	EVENTS

PRISM COUNSEL

Matter Observability & Governed Legal Execution.

" WHERE INTELLIGENCE MEETS LEGAL PRECISION. "

- Active matter tracking
- Deadline risk queue
- AI settlement forecasting
- Full discovery & playbook management

IMPERIUM

Cloud Sovereignty at Scale.

" THE EMPIRE DOESN'T ASK PERMISSION — IT GOVERNS. "

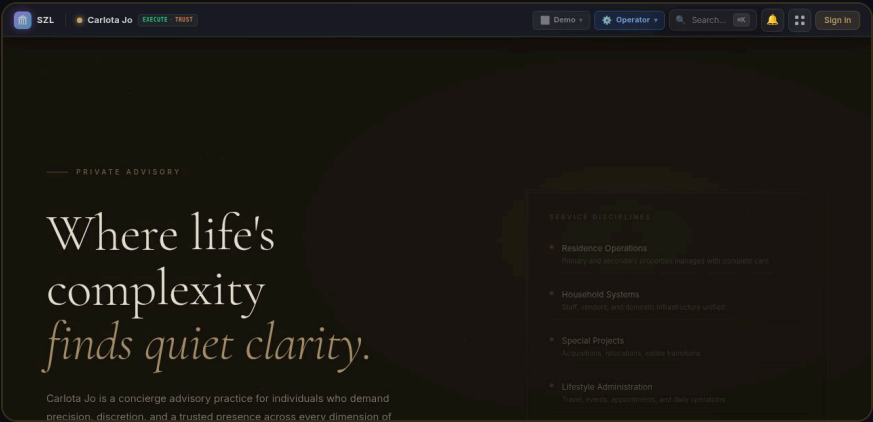

- Aquila Score: infrastructure health (0-100)
- Legion / Cohort / Sentinel Azure hierarchy
- Threat levels: PAX → VIGILIA → BELLUM → FUROR
- Praetorian Guard zero-trust perimeter

CARLOTA JO CONSULTING

Where Life's Complexity Finds Quiet Clarity.

PRIVATE ADVISORY FOR INDIVIDUALS WHO DEMAND PRECISION, DISCRETION, AND A TRUSTED PRESENCE.

- Residence Operations
- Household Systems
- Special Projects & Lifestyle Administration
- Advisory Continuity

STEPHEN LUTAR — FOUNDER & ARCHITECT

"I build command systems that close the loop from signal to decision to auditable action."

ACROSS FIVE DISTINCT INDUSTRIES UNDER ONE COMPOUNDING ARCHITECTURE.

- FOUNDER
- CEO
- ARCHITECT
- CYBERSECURITY
- MARITIME
- AI ORCHESTRATION

This is not a product company. This is a platform holding company.

Each system is production-grade and generates its own revenue signal. Each shares infrastructure, design language, and intelligence with every other system. The marginal cost of adding the eleventh product is a fraction of the first.

- Accelerate go-to-market across three flagship verticals
- Deepen the shared AI intelligence layer (CORTEX)
- Expand the Aegis defense platform into enterprise accounts
