#### METHODOLOGY

---

Every figure in this brief is derived from artifacts/audit/platform-capability-manifest.json (manifest version 1.0.0). The readiness score weights live capabilities at 1.0, working demos at 0.75, and partials at 0.4. Capability statuses use SZL's published status definitions: live, working\_demo, partial, stub, broken, undocumented. This brief is regenerated whenever the manifest changes — no manually edited claims.
